

Folding Pre-folds Guide

Boys Fold

Maximum absorbency at the front
Fold up a third at the front, then fold in 3 vertically
(following the vertical stitching lines)

Girls Fold

The most basic fold - just fold in 3 to give maximum absorbency towards the middle and back - make sure the thicker middle section is in the middle of the fold (i.e. the stitched lines should be horizontal)

Best for Liquid Stools

Roll the edges into the middle so that they touch

Breast Fed Fold

Fold a third up at the front, fold the sides into the middle, then 'fan' out at the top which will really help containment
