Close Parent Pop-In

A unique hybrid system which is a cross between an all-in-one & a 2-part. The inner soaker attaches to the outer shell with poppers so you can take it apart (for washing & drying) and put it back together before use. This gives an excellent dry time without compromising on absorbency.

The nappy comprises 3 parts; the outer shell (with integral absorbent panel), the shaped inner soaker and the insert all of which popper together to form an all-in-one nappy (see diagram on next page). There is a night time booster option too. The shaped inner soaker has elasticated legs and back for containment and provides absorbency where needed and less bulk where it isn't.

Double elasticated leg gussets help containment further.

Highly absorbent bamboo or quick drying Minkee fabric options.

Three sizes achieved in one nappy by adjusting the poppers on the front giving 'birth to potty' use.

Fits from 8lbs to 35lbs (3.6 - 16kgs)

Hunny Highlights

- ✓ Very absorbent - 3 different insert options
- ✓ 2 different fabric options
- ✓ Dry time excellent - particularly for a bamboo nappy (even quicker for the Minkee option)
- ✓ 3 sizes in one - will fit a large toddler
- ✓ Hook & Loop fastenings - easy to use
- ✓ Good containment - leg gussets
- ✓ Great night nappy with nighttime booster option

Nappy Do

- ✓ Wash all parts after each use
- ✓ Fold over velcro tabs to avoid snagging
- ✓ Un-popper the nappy so it opens into a 'chain' to wash thoroughly
- ✓ Use 60 degree wash & normal non-bio detergent
- ✓ Ensure your washing machine runs cold rinse followed by hot cycle with detergent & finishes with a cold rinse cycle (if particularly dirty) - most machines can or do
- ✓ Line dry in the sun where possible - quicker & uses sun bleaching otherwise inside on a drier
- ✓ Inner soakers can be tumble-dried

Hunny Heads-up

- ✗ Pretty bulky with all the soakers in - but you'd probably only need all three at night
- ✗ Hook & Loop only - easily undone by toddlers (but will be under clothes most of the time so this is not really an issue)
- ✗ Popping-in the inserts can be a bit fiddly but is no problem once you get into the swing of it!

Nappy Don't

- ✗ Don't use fabric conditioner
- ✗ Don't use vinegar - it damages the bamboo fibres
- ✗ Don't tumble dry outer
- ✗ Don't iron nappies - it's unnecessary
- ✗ If using nappy cream, protect the nappy with a paper liner

Hunny Hints

- ✓ After washing and drying, take 5 minutes to popper them all back together & you have a whole stack of nappies assembled and ready to go.

Our thoughts on a great nappy...
