

PopnGro Pocket

The PopnGro is a two sized pocket nappy designed to meet the needs of the smallest newborn right through to the chunkiest toddler without compromise. These are one of our favourite nappies - they fit really well and are very reliable and easy to use.

Each size nappy can be adjusted to make a 'size within a size' by changing the popper setting at the front of the cover. And size 2 on the largest setting really will fit a large toddler. They also come complete with two ultra absorbent soaker pads made from quick drying microfibre. You can add one or two at a time to the pocket to obtain the right level of absorbency for your baby. You can also add more boosters for night time. A gorgeous soft fleece layer wicks moisture away from baby's skin.

They have sturdy velcro-type 'hook and loop' (Aplix) fastenings making for easier change time!

The Hunnybums HQ 'go-to' nappy!

*Size 1 - 7lbs to 20 -25lbs

*Size 2 - 20lbs to 35lbs+

Hunny Highlights

- ✓ 2 sizes ensures slim fit and reduces wear
- ✓ Very absorbent with large pocket for extra boosters (for night time, long journeys etc.)
- ✓ Quick drying
- ✓ Size 2 fits large toddlers - bigger than some other 'birth to potty' nappies
- ✓ Very soft 'stay dry' fleece layer next to skin
- ✓ Unisex print and colours - safe buying antenatally

Nappy Do

- ✓ Pre-wash nappy a few times before use to reach full absorbency
- ✓ Wash nappy & inserts after each use
- ✓ Fold over any velcro tabs to prevent snagging
- ✓ If soiled, knock solids into toilet. Small solids stuck to the fleece will dissolve in the wash
- ✓ Separate inserts and outer & store in dry nappy bucket
- ✓ Wash at 40°C in non-bio detergent - only use half the recommended amount - plus sanitiser (see [Washing and Drying](#) info sheet)
- ✓ Tumble dry on low heat or hang to dry

Hunny Heads-up

- ! Two sizes can seem expensive but some 'birth to potty' nappies are outgrown by large toddlers. 2 sizes also reduces wear on the nappies - useful if you plan to use on further children
- ! Aplix fastenings are easily undone by some toddlers (so are disposable nappy fastenings!)
- ! If the size 1 nappies are leaving a red mark around the legs, it's time for size 2

Nappy Don't

- ! Don't use nappy rash ointments/creams without paper liner to protect nappy (see [Nappy Rash](#) info sheet)
- ! Do not tumble on high heat
- ! Don't use fabric softener, bleach or biological detergents (especially containing optical brighteners)

Hunny Hints

- ✓ Once washed, place the pads into the pocket of the outer and stack in nappy drawer - you'll feel really virtuous and get a warm glow just looking at your gorgeous pile of nappies ready to go!
